2 April 1958

MEMORANDUM FOR: 25X1A9a  
SUBJECT: Possible Rail Development Near Czech - U.S.S.R. Frontier  
REFERENCE: Your memo 2023-L-12238, dated 13 February 1958

25X1X7

1. Reference your memorandum of 13 February enclosing a questionnaire prepared by [redacted] as a briefing for his military attaché regarding possible rail developments near the Czech - U.S.S.R. frontier.

2. A thorough search of our files fails to reveal any information that will contribute to that given in the questionnaire. With specific reference to question III, 1st, one report from an assistant military attaché who visited the area in 1955 stated that both standard and broad gauge tracks extended eastward from [redacted] toward the frontier but that rails were rusted and appeared to have been abandoned. This would indicate that foundations are still in existence. The Czech railway time table for 1957-58, Table 44 d, indicates passenger service eastward to [redacted] but not beyond.

3. This reply has been coordinated with our Geographics Division.
